**Location:** West Laura

---

## Summary

Ambitious and results-driven programmer with over 5 years of experience in software development and data science. Proven expertise in designing and implementing robust microservices architectures and machine learning pipelines. Committed to continuous improvement and learning, with a strong background in cloud computing and DevOps practices. A collaborative team player with excellent problem-solving skills and a passion for technology.

---

## Skills

- **Git:** Advanced
  - **Data Science:** Expert
  - **Go:** Expert
  - **Java:** Beginner
  - **PostgreSQL:** Expert
  - **AWS:** Advanced
  - **Python:** Advanced
  - **MySQL:** Advanced
  - **DevOps:** Advanced
  - **Angular:** Advanced
  - **Microservices:** Advanced
  - **React:** Expert
-

# Experience

## Software Engineer

**Tech Innovations Inc.** - West Laura, CA

June 2020 - Present

- Developed and maintained a **microservices-based architecture** for a high-traffic e-commerce platform, improving system scalability by 40%. - Designed and implemented an **API Gateway** that streamlined service communication, reducing response times by 30%. - Collaborated with cross-functional teams to create a **machine learning pipeline** that enhanced product recommendation accuracy by 25% using Python and AWS services.

## Data Scientist

**Data Solutions Corp.** - West Laura, CA

January 2018 - May 2020

- Led a team of data scientists to develop predictive models using **Python** and **PostgreSQL**, resulting in a 20% increase in customer retention rates. - Utilized **Go** for backend development of data ingestion services, improving data processing speed by 50%. - Conducted data analysis and visualization projects using **AWS** and various data science tools, leading to actionable insights for business strategy.

---

# Projects

## Microservices Architecture

- Spearheaded the design and implementation of a microservices architecture for a financial application, which improved system modularity and reduced deployment times by 35%.

## API Gateway

- Developed an API Gateway to manage and route requests between various microservices, enhancing security and reliability of client interactions.

## Machine Learning Pipeline

- Created an end-to-end machine learning pipeline that automated data processing and model training, which reduced the time to deploy new models from weeks to days.
- 

## Certifications

- **Microsoft Azure Developer**
  - **Scrum Master Certification**
  - **AWS Certified Solutions Architect**
- 

## Education

### **Bachelor of Science in Computer Science**

University of West Laura - West Laura, CA

Graduated: May 2017

---

## Additional Information

- Passionate about open-source contributions and currently maintaining a GitHub repository with various projects focused on data science and cloud computing.
  - Regular participant in local hackathons and coding competitions, achieving top placements and networking with industry professionals.
-
