Summary

Enthusiastic and detail-oriented programmer with over 5 years of experience in software development and a strong foundation in data science. Proven track record of delivering high-quality solutions in fast-paced environments. Skilled in a variety of programming languages and technologies, with a passion for driving innovation through efficient coding practices and collaborative teamwork.

Experience

Senior Software Engineer

Tech Innovations Ltd. - Reedmouth, UK

June 2021 - Present

- Led the development of a **Content Management System** that streamlined content delivery by 40%, enhancing user engagement and site performance.
- Implemented a robust **Microservices Architecture** that improved system scalability and reduced deployment times by 30%.
- Collaborated with cross-functional teams to integrate **Docker** for containerization, resulting in a 25% increase in deployment efficiency.

Software Developer

Creative Solutions Inc. - Reedmouth, UK

April 2018 - May 2021

- Developed a dynamic **Web Application** using **JavaScript** and **React**, achieving a 50% increase in user satisfaction according to post-launch surveys.
- Utilized **MySQL** for database management, optimizing query performance which improved application speed by 20%.
- Contributed to the team's adoption of **Jenkins** for continuous integration, reducing integration time by 15%.

Junior Developer

NextGen Tech - Reedmouth, UK

January 2016 - March 2018

- Assisted in building web applications using **Java** and **TypeScript**, enhancing application functionality and user experience.
 - Participated in data analysis projects utilizing **Python**, enabling better business decision-making through data-driven insights.
 - Supported the team in transitioning applications to **Docker**, gaining hands-on experience in container orchestration.
-

Skills

- **Jenkins:** Expert
 - **Docker:** Advanced
 - **Data Science:** Advanced
 - **MySQL:** Advanced
 - **JavaScript:** Advanced
 - **Java:** Expert
 - **TypeScript:** Intermediate
 - **Python:** Advanced
 - **Go:** Expert
 - **React:** Intermediate
-

Projects

- **Content Management System:** Developed a scalable CMS for a major client, enabling non-technical users to manage content effortlessly, which led to a 40% decrease in support tickets related to content updates.
 - **Web Application:** Created a responsive web app that integrated user feedback loops, leading to significant improvements in feature prioritization based on user needs.
 - **Microservices Architecture:** Designed and implemented a microservices-based system for an e-commerce platform, enabling independent deployments and reducing downtime during updates.
-

Education

Bachelor of Science in Computer Science

University of Reedmouth - Reedmouth, UK

Graduated: 2015

- Focused on Software Engineering and Data Science.
 - Developed a capstone project on predictive analytics, which received accolades from faculty for its innovative approach.
-

Certifications

- **Certified Java Developer** (Oracle, 2020)
 - **Docker Certified Associate** (Docker, 2021)
 - **Data Science Professional Certificate** (Coursera, 2022)
-
