**Location:** South Brian

---

## Summary

Passionate and results-driven programmer with over 5 years of experience in software development and a deep expertise in machine learning. I thrive in collaborative environments and have a proven track record of delivering high-quality software solutions that enhance user experience and drive business outcomes. Seeking to leverage my skills in a challenging new role where I can contribute to innovative projects.

---

## Experience

### Software Engineer

**Tech Innovations Inc.** — South Brian, CA

June 2020 - Present

- Developed a **Payment Processing System** that improved transaction speed by 30%, utilizing **Flask** for the backend and **PostgreSQL** for database management.
- Collaborated with cross-functional teams to design and implement a **Content Management System** that increased content publishing efficiency by 40%, integrating **Angular** for responsive UI.
- Led the development of a **Real-time Chat System**, enhancing customer support capabilities and reducing response time by 50%.

### Junior Developer

**Future Tech Solutions** — South Brian, CA

January 2018 - May 2020

- Assisted in building web applications using **JavaScript** and **MongoDB**, contributing to projects that improved user engagement by 25%. - Participated in the migration of legacy systems to cloud-based solutions, obtaining **Microsoft Azure Developer** certification to support the transition.

---

## Skills

- **Machine Learning:** Expert
  - **Flask:** Advanced
  - **PostgreSQL:** Advanced
  - **Angular:** Intermediate
  - **MongoDB:** Intermediate
  - **JavaScript:** Intermediate
- 

## Projects

### Payment Processing System

- Designed and implemented a secure payment gateway that handles high volumes of transactions, ensuring compliance with PCI DSS standards.

### Content Management System

- Developed a user-friendly interface for content creators, allowing for seamless content creation and management, resulting in a 40% increase in published content.

### Real-time Chat System

- Engineered a scalable chat system that supports thousands of concurrent users, improving customer satisfaction scores significantly.
-

## Certifications

- **Microsoft Azure Developer**
  - **Google Cloud Professional**
  - **Docker Certified Associate**
- 

## Education

### **Bachelor of Science in Computer Science**

University of South Brian — South Brian, CA

Graduated: May 2017

- Relevant Coursework: Data Structures, Algorithms, Machine Learning, Web Development

---

## Personal Projects

- Developed a personal blog using **Flask** and **PostgreSQL**, showcasing programming tutorials and machine learning insights, attracting a monthly readership of over 500 users.
  - Created an open-source library for simplifying API integrations, which has gained traction in the developer community with over 100 stars on GitHub.
-
