## Summary

Detail-oriented software engineer with over 5 years of experience in designing and implementing scalable applications. Proficient in a variety of programming languages and frameworks, with a strong emphasis on developing robust back-end systems and responsive front-end interfaces. Passionate about leveraging technology to solve complex problems and improve user experiences.

## Experience

### Software Engineer

**Tech Innovations Inc.** — Millermouth, CA

June 2019 - Present

- Developed and maintained a **web application** that serves over 10,000 users daily by utilizing **Django** and **Vue.js**, achieving a 40% improvement in load times.
- Collaborated with cross-functional teams to design a **microservices architecture**, which improved system scalability and reduced deployment times by 30%.
- Implemented unit tests and continuous integration pipelines that increased code coverage to 85% and reduced bugs in production by 25%.

## Junior Developer

**CodeCrafters LLC** — Millermouth, CA

January 2017 - May 2019

- Contributed to multiple projects using **C++** and **Java**, leading to the successful launch of three major software products that enhanced user engagement by 20%.
- Assisted in migrating legacy applications to modern **JavaScript** frameworks, resulting in a 15% increase in application performance.
- Engaged in Agile methodologies as a certified **Scrum Master**, facilitating sprint planning and retrospectives to enhance team productivity.

## Skills

- **Python** - Advanced
- **Django** - Expert
- **C++** - Advanced
- **Java** - Advanced
- **JavaScript** - Advanced
- **Vue.js** - Advanced
- **Node.js** - Intermediate
- **TypeScript** - Intermediate
- **MySQL** - Advanced
- **Microservices** - Beginner

## Projects

### Web Application

- Developed a responsive web application using **Django** and **Vue.js**, allowing users to track their fitness goals. The application has received positive feedback, with a user satisfaction rating of 95%.

## **Microservices Architecture**

- Designed a microservices architecture for an e-commerce platform, which enabled independent deployment of services, reducing downtime by 50% during updates and maintenance.

## **Education**

### **Bachelor of Science in Computer Science**

**Millermouth University** — Millermouth, CA

Graduated: May 2016

- Graduated with honors, achieving a GPA of 3.8/4.0.
- Completed a capstone project on "Distributed Systems" that was recognized for its innovative approach to data management.

## **Certifications**

- **Google Cloud Professional** - Google Cloud Certification (2022)
  - **Scrum Master Certification** - Scrum Alliance (2021)
-
