Location: Combsburgh

Summary

Dedicated and passionate software developer with over 5 years of experience in building robust applications and solutions. Proficient in a variety of programming languages and frameworks, with a strong focus on backend development and cloud technologies. Known for my problem-solving skills and ability to deliver high-quality code under tight deadlines. I thrive in collaborative environments, and my goal is to leverage my expertise in Python, Kubernetes, and machine learning to drive innovation and efficiency in tech projects.

Experience

Senior Software Engineer

Tech Innovators Inc., Combsburgh
January 2021 - Present
- Led the development of a **Payment Processing System** that improved transaction speed by 40% and reduced processing errors by 25% using **Python** and **Flask**. - Collaborated with cross-functional teams to design and implement an **API Gateway** for efficient microservices communication, enhancing system performance by 30%. - Mentored junior developers in **React** and **Kubernetes**, fostering a culture of continuous learning within the team.

Software Developer

Creative Solutions Ltd., Combsburgh
June 2018 - December 2020
- Designed and built a **Content Management System** that streamlined content delivery for clients, resulting in a 50% increase in user engagement. - Implemented containerization of applications using **Docker**, leading to improved deployment efficiency and consistency across environments. - Developed and maintained scalable **microservices** architecture, utilizing **Rust** for performance-critical components.

Junior Developer

StartUp Hub, Combsburgh
August 2016 - May 2018
- Contributed to the development of a mobile application that reached over 10,000 downloads in its first month, leveraging **Node.js** and **React**. - Assisted in the integration of **Machine Learning** models for predictive analytics, increasing accuracy of results by 15%. - Gained hands-on experience with **MySQL** for database management and optimization.

Skills

- **Python**: Expert
- **Flask**: Expert
- **Kubernetes**: Expert
- **Rust**: Advanced
- **Machine Learning**: Advanced
- **Go**: Intermediate
- **React**: Intermediate
- **Microservices**: Intermediate
- **Node.js**: Intermediate
- **MySQL**: Expert
- **Docker**: Beginner
- **JavaScript**: Beginner

Projects

API Gateway

Created a robust API Gateway to facilitate communication between various microservices, improving data retrieval speeds and reducing downtime.

Payment Processing System

Developed a secure and efficient payment processing system that decreased transaction times and increased customer satisfaction.

Content Management System

Led a team to build a user-friendly content management system, enabling clients to manage their digital assets more effectively and increasing user retention.

Mobile App

Collaborated on a mobile application project, focusing on backend development and integrating machine learning algorithms for enhanced user experience.

Certifications

- **Certified Kubernetes Administrator**
- **Scrum Master Certification**
- **Google Cloud Professional**

Education

Bachelor of Science in Computer Science
University of Combsburgh
Graduated: May 2016
